INFORMATION:

INFINITY STONE, A NEW DIMENSION IN ARCHITECTURE.

Infinity Stone is the latest product by Garfloor, the Gardenia Orchidea Ceramics Group brand that focuses on the development of porcelain stoneware with more technological content.

Infinity Stone is the outcome of careful analysis into the use of stone in architecture over the centuries and is available in 120x120cm slabs with 8 modular shapes, making the collection perfect for very complex projects and large scale surfaces in public places and shopping areas.

It is available in 6 colors and 2 versions with different surface finishes:

- *Naturally structured.* This one has an opaque, textured finish, reminiscent of the surface of a block of hewn stone. Its characteristic relief texture helps create a special soft, totally naturally effect.
- *Partially semi-polished finish.* This surface has a slightly satin finish and is characterized by a unique motif with translucent "waves". It is vibrant to the touch with a subtle texture which is similar to the surface of stone polished by water.
